

Vehicle Safety Warning

(IMPORTANT INFORMATION YOU SHOULD KNOW)

Driving with any windshield damage is a safety hazard to you, your family and your friends. If you're driving with a damaged windshield, for safety reasons, we recommend that it is **REPAIRED** as soon as possible. **Do Not Procrastinate!** Did you know the windshield is designed as a major part of the exterior structure of a vehicle if you were to get into an accident? You may say you have had the damage to your windshield for sometime and nothing has happened so far. Well, consider yourself fortunate. Any size chip or crack weakens the structure of the windshield.

The original factory installed seal is considered to be **500 times stronger than that of a replacement seal.** (For that reason alone you may want to consider repairing the windshield over replacement.) A new windshield if not properly installed, which 65 percent are not, could effect the bonding strength as well as lead to leakage that could result in interior damage or rust around the windshield.

It's a fact that Cracks and Stone damage lessens the value of your vehicle and affects the integrity of your windshield when it comes to safety, strength & visibility if it is not repaired!

With glass, you can never tell when a damage area could spread to the point where your only choice is to replace the entire windshield. That in itself will cost you unnecessary replacement cost and could affect your insurance premiums or at least put a major dent in your out of pocket expenses. By repairing your damage windshield, it does not effect your insurance premiums, as a matter of fact, insurance companies encourage repairing over replacement.

Our WINDSHIELD REPAIR meets the State of California Vehicle Code, is Recommend & Approved by Insurance companies, could prevent you from receiving a Police Citation, repaired by a **Factory Certified Technician** and is **guaranteed 100% not to spread.** We use the highest quality resins to restore the original strength of the windshield and it improves the sight of the damaged area 80 to 98% depending on the actual type damaged received.

Who uses our service: Police and Fire Dept., Ambulance Co., Rent-a-Car and Auto Body Shops, City and County vehicles, School Bus Co., Taxis, Limo's and Shuttle Co. to mention a few.

Call TODAY **858-277-7713** or **619-850-2977** for a "FREE" estimate if you have or received a damaged windshield. We come to HOME or OFFICE.

"It's Cheaper to Repair than Replace"
